

Department Formula Examples

Formula	Result	Description
=Department(0)	*	The department code chosen on the toolbar. ** means consolidate is turned on and the figures are the sum of all departments
=Department(1)	Consolidated Departments	The name of the department selected from the toolbar. If the consolidate option is chosen, then the text 'Consolidated Departments' will be displayed, otherwise the name of the department will be shown
=DEPARTMENT(" 100")	100 - East Coast USA	The description of a specific department number. Note that leading blanks must be specified to fill the department code to the full 6 characters
.RangeDept		Used to repeat an account range for each department in the chart.
100	100 - East Coast USA	
150	150 - West Coast USA	
200	200 - East Coast Canada	
250	250 - West Coast Canada
